

List of Suitable GPS Units compiled by Eric Sommer

The cost of the Marine units is not that much more than some of the others. But in any case here is a list of suitable units. Please note most Garmin units will work. Message NORMC for more details..

LAND UNITS

- NUVI 660
- OREGON 450 - Will need to purchase a suitable mount and charging kit - Mounts available from RAM Mounts
- MONTANA 600

MARINE UNITS

- GPSMAP521
- GPSMAP525/526
- GPSMAP 720

COMBINATION MARINE / LAND UNITS

- GPSMAP 620

OUTDATED UNITS. THESE UNITS HAVE BEEN DISCONTINUED BY GARMIN. SPARES & DATA CARDS NO LONGER AVAILABLE. TRY & AVOID.

- GPSMAP276C with a minimum 32MB data card, external antenna
- GPSMAP292C with a minimum 32MB data card, external antenna
- NUVI 500 - these are end of life and are actually not all that great - but they suffice.

Units NOT Acceptable

- Road going NUVI's - many of these are fragile and completely unsuitable for off-road - they will get damaged and they are expensive enough to warrant a proper unit for off-road racing.
- Non Garmin Units
